See more readers

Provided you have your [reader visibility settings](#) enabled, as a +Plus user you will see the profiles of all of your readers who are logged in and also have their visibility settings enabled. Those who don't fit these criteria will show up on the total reads numbers but you won't see their individual profiles.

Advanced stats

As a +Plus user you will see advanced stats about your readers, including a breakdown by seniority and discipline. You'll also get information about how your readers discover your research on ResearchGate (such as through ResearchGate, Google, etc.).

W From the page: Risk factors of schizophrenia

... In particular, the combination of a maternal infection during pregnancy followed by heightened stress at the onset of sexual maturity markedly increases the probability that a mouse develops symptoms of schizophrenia, whereas the occurrence of one of these factors without the other does not.[168] ...
