Adding your institution and department to your profile

Your institution is displayed on the top of your profile and shows where you currently conduct your research. Add your institution by following these steps:

1. Go to your [profile](#)
2. Click on **Edit** next to the Current affiliation section on the right side of the page and select **Edit current affiliation**
3. Start typing the name of your institution in the field
4. Select your institution and department from the drop-down menus
5. Click **Save** to confirm your changes.

Note: If your institution or department isn't one of our suggestions, please enter it manually and click **Save**.

Changing your institution and department

Changing your institution or department can be done in a few simple steps:

1. Go to your [profile](#)
2. Click **Edit** above your current institution or department
3. Start typing the name of your new institution or department in the field
4. Select your institution and department from the drop-down menus
5. Click **Save** to confirm your changes.

Note: If your institution or department isn't one of our suggestions, please enter it manually and click **Save**.

Can I have multiple affiliations?

Currently, the only way to add multiple affiliations to your profile is by listing them as part of your **Research Experience**:

1. Go to your profile's [Experience](#) tab
2. Click on 'Where have you worked, and what did you do?' or on the Edit button under **Professional experience**
3. Enter details about your professional and research experience, indicating any additional institutional affiliations
4. Click **Save** to confirm your changes.

Publications are missing from my institution/department

At the moment, publications on ResearchGate are only attributed to one institution/department. As publications are carried out at a particular institution /department, they are only included in the publication count for the institution/department that we identify using the publication's metadata, rather than the author's current affiliation. However, as publication reads are based on individual members, these are automatically included in your institution and department stats.

We have not yet finished extracting data and assigning publications, and we are constantly working on optimizing our algorithms, so if your publication should be affiliated to your department but is not yet, this will eventually happen automatically if the affiliation is mentioned in the publication's metadata or full-text. We advise you to upload the publication's full-text if the affiliation is present there. We are, unfortunately, unable at the time to edit the affiliation part of the metadata ourselves. Thank you for your patience.
