COVID-19 research community

Our [COVID-19 research community space](#) aims to keep researchers up-to-date on the latest scientific developments and is dedicated to interdisciplinary collaboration.

We feature the most read and most recommended publications as well as trending publications to help you discover the most relevant research. [Community moderators](#) and [key contributors](#) will make it easier to discover high quality and on-topic research by recommending what is displayed in the space.

Expert Finder

Expert Finder is a new feature on ResearchGate that enables researchers and organizations working on the topic of COVID-19 to directly contact other researchers with collaboration opportunities. The ability to connect researchers and advance science is a core part of ResearchGate's mission and this is an expansion of our existing service.

How can I access the Expert Finder?

This free feature is exclusively available to those engaged in work on COVID-19 and who express a specific need for finding another researcher. Access can be requested from the 'Expert Finder' tab on the COVID-19 research community space.

How do I contact a researcher I've found in Expert Finder?

Once you identify a researcher you want to reach out to via the Expert Finder, you will find the 'Send message' option on the 'Experience' tab of their profile.

Free Job Posts

With over 16 million scientists and researchers, ResearchGate is the leading scientific platform. For a limited time, we're offering free job posts for qualifying teams that are actively working to combat the pandemic.

How do I avail of free job posts?

You can find out more about our free job posts offer and how to get in touch with us [here](#).
