

Reporting comments, project updates, and replies

You can help us make sure that publication feedback, project updates, and replies remain high quality by reporting anything that falls into a category we have identified as being inappropriate in our [Community Guidelines](#) or [Terms of Service](#).

It's important that you follow the exact steps we describe below so that we can find the exact content you are reporting.

Please note: If you're not a ResearchGate member, the below steps do not apply. Instead, please report inappropriate comments, project updates, and replies by getting in touch with our [Community Support](#) team. Please be sure to include a hyperlink to the page where the content appears on ResearchGate, as well as a screenshot of the exact content you're reporting. This gives us the information we need to find it on site. Please also include your reason for reporting.
